

Reincarnation in the West

Reading of the Day-March 27, 2011

(This is the internet translation of the interview of journalist Vicki Mackenzie and Dr. Hazel Denning)

In Dr Denning's office hung degrees or certificates: two doctoral degrees, two masters degrees, bachelor degrees and a lot of authenticated documents showing she learned medical hypnosis and parapsychological science' When she was twenty years old, she read a book about reincarnation, and discovered that all the world's major religions believe in reincarnation including Christianity until 533 AD ; a Roman king and queen forbid people to talk about reincarnation . two prominent priests were killed because they wanted to keep talking about rebirth in the book. Few people know these facts .

Vicki Mackenzie: What was the born-again phenomenon? **Hazel Denning:** When making a return to past lives and find out why parties choose to be reborn into this family, and the purpose of their return to earth to do, then everyone has the same answer: "It I really do not want to return to the world at all. Pressed into the flesh like going to jail, too stuffy. " When I asked again: "So why he / she returned, someone caught her in the back where?" then the answer is always: "Because the world is a school to train their dignity. To cultivate spiritual, wants to raise up the world again. But I want to cultivate a genuine interest so I have return to this world. " That is the answer to my record.

Vicki Mackenzie: In your experience, people return to this world How many times? **Hazel Denning:** Countless times, until they learn what achievements are expected. Even in this present life a person must take years to clear the meaning of difficult obstacles happen to us..

Vicki Mackenzie: Have you ever proven that those stories really happen? **Hazel Denning:** Yes. I have the heart to track every possible opportunity. For example the case of a certain client who didn't want hr children to see a group of circus performers. She said banning such things really is ridiculous but she could not do anything else. When brought back to the previous life by hypnotism she found herself as "a midwife shark" (*the fast lady*) of a circus and she hated his role. She remembered the name of the woman as well as the city where she performed. There is another client present that day knew this town. He will volunteer to research the early 20th century, indeed, in a city that has that name there was a circus with the fat lady role. In her present life the lady is also overweight.

Vicki Mackenzie: Did you see anyone choosing to return closer to the people they know from many eons ago? **Hazel Denning:** Yes, but then roles are changed. Some people were reborn together to resolve unfinished issues. Some people want to come back to help the family. I think the martyrs, or those who choose death because it means they do so voluntarily in order to awaken the conscience of mankind. So that karma can only be as a punishment is not true, there are also amateur and professional sound. That is the law of karma.

Vicki Mackenzie: After a person dies, how long after that will he or she be reborn? **Hazel Denning:** It can be days or weeks or centuries. Soldiers who die on the battlefield usually are reborn rather quickly. Their soul cannot stand wandering around loneliness. For others it can take years or maybe more. I have known cases when people from the Ice Age come back to our world.

Vicki Mackenzie: How about extra terrestrial people. Have you ever met such cases? **Hazel Denning:** Yes, there was a man who said he came from another world and that ours is the lowest on the reincarnation tree. He wrote in a strange scripture and translated it in English. He also said that on that world he knew about a life where past, present and future happen at the same time. The story was very strange indeed.
